**INVESTMENT OBJECTIVES**

The aim of the investment strategy of The ROUSSOS MCJ SUPERANNUATION FUND ("the Fund") is to accumulate funds for the payment of superannuation benefits as set out in the trust deed governing the Funds operations.

The Trustees have considered the following investment objectives in formulating the investment strategy for the Fund:

The Trustee will:

- At all times act prudently to pursue the maximum rate of return possible, subject to acceptable risk parameters, and the maintenance of whatever diversification that can be achieved with modest assets.
- Ensure that all investments are authorised under the trust deed and are made for the sole purpose of providing benefits to Member(s).
- Establish within the Fund a tolerance to short term fluctuations in income and capital values given the profile of the ages of the Member(s).
- Invest to ensure sufficient liquidity is retained -within the fund to meet benefit payments due, and will adjust its specific objectives where the trustee' believe the risk profile of the Fund has changed. The liquidity of the fund must also be given in light of the cashflow requirements of the Fund.
- Have proper regard to the risks associated with the investments given the Fund 's objectives and cashflow requirements.
- Have proper regard to the composition of the fund's investment portfolio, including diversification of the Investments.
- Have proper regard to the ability of the fund to meet its current and prospective liabilities.
- Make investments in conjunction -with Member(s) or the Principal Employer, Provided they are under taken on an arms length basis.
- Consider suggestions from Member(s)for specific investment in relation to Member(s) generally for an individual Member(s), and may make investments in accordance with those suggestions provided that they fall within the investment strategy of the Fund.
- Having considered the liability profile of the Fund, the Trustee has adopted the following objectives for the investment of the assets of the Fund:

(a) to achieve an investment return (net of tax and charges) that exceeds CPI by at least 2% per annum when measured over a rolling 5 year period;

(b) to have a low expectation of negative returns in any 12 month period.

- The investment objectives of the Fund will be reviewed annually and at such other times as a significant event occurs -which affects the Fund.

### **INVESTMENT STRATEGY**

In order to achieve the investment objectives of the Fund, the Trustee - wishes to adopt and pursue the strategy set out hereunder. The Trustee reserves the right to implement more than one strategy as it sees fit, and to offer separate strategies to Member(s). The Trustee also reserves the right to implement separate and different Action plans in the acquisition and disposal of assets pursuant to this strategy.

Diversification:

The Trustee wishes to implement as much diversification as it is able given the assets Of the Fund and elects to diversify amongst a number of investments. In considering the degree of diversification appropriate to the Fund, the Trustee has determined to take into account:

- the existing assets of the fund;
- the existing assets of the family of the Member(s) of the fund;
- the existing assets of the Member(s) of the fund in complying superannuation funds; and
- the Funds access to expert investment advice.

With regard to the investment objectives the Trustees have adopted an investment strategy of seeking in the long term a diversified portfolio mix of investment classes as follows:

- Real property including both direct and indirect investment by the acquisition of units in a property holding unit trust.
- Shares, options, and other rights to shares including both direct investment and indirect investment through equity trusts or other pooled investment vehicles.
- Cash including fixed interest term deposits, bonds, cash management trusts and appropriate derivative products.
- Other assets including fine art, collectable items, antiques and paintings. If these are invested in the Trustee "will obtain a valuation from an appropriate qualified valuer prior to the investment being made. Only 5% of the assets funds should be invested in this category.

The Trustees consider that no specific percentage range for each of the above asset classes should be adopted (with the exception of the last category). Each other asset class should be considered on its own merits at the particular time the investment is proposed having regard to always maintaining an appropriate degree of diversification.

A single asset strategy may be adopted for the Fund if the asset - which is proposed meets the investment criteria of the Fund. If a single asset strategy is adopted then

the Trustee will look to diversify the Fund at a later date - when further contributions are made to the Fund and income is derived by the Fund. If a single asset strategy is adopted then the Trustees need to ensure there is a method of liquidity maintained in the Fund to ensure benefits can be paid to members in accordance with the terms of the trust Deed.

All investments will be made on an arm 's length basis and will be acquired, maintained or disposed of on commercial terms at market rates of return. The Trustees consider that this investment strategy fulfils the principal strategy of the fund which is to maximising returns to members having regard to risk and investment objectives of the Fund.

### **Monitoring**

To monitor the success of the investment policy in achieving the investment objectives, the Trustee will take the following action:

- (a) compare investment returns against investment objectives on an annual basis;
- (b) compare investment returns against cash rates available over a 12 month period and review this strategy on an annual basis or on such other basis as it believes appropriate.
