Key Risks:

Key risks include:

- Your return is affected by the performance of the Reference Asset. There is no guarantee that the Reference Asset will perform well. If the Reference Asset performs negatively during the Investment Term you could lose some or all of your invested capital.
- The Units for Series 30 have varying levels of exposure to the Reference Asset depending on volatility due to the variable Participation Rate. It operates by varying the exposure that the Units will have to the Reference Asset depending on the Realised Volatility of the Berkshire Hathaway Inc Class B Shares and the Target Volatility. There is the risk that the Participation Rate could drop to significantly below 100% during the Investment Term in which case Investors will not gain the full benefits of an increase of the value of the Reference Asset.
- Investors in Series 30 should note that there is a lag in measuring the Realised Volatility of the Reference Asset. This means that where there has been a period of high Realised Volatility, the Investor's exposure to the Reference Asset will be low, regardless of whether the Reference Asset is performing positively or negatively.
- Sequoia Launch Coupons (but not the Final Value) for Series 30 is subject to movements in the AUD/USD exchange rate
- The Series 30 investment is subject to averaging. Averaging may impact the performance of the investment during the Investment Term when compared to an investment that does not use averaging.
- There is no guarantee that the Units will generate returns in excess of any Fees during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back or Early Maturity Event you will not receive a refund of any Fees.
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty;
- The Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.
