Glossary of terms

Opening Balance and Closing Balance

The number of TCL triple stapled securities as at the close of business on 30 June 2020. The number of TCL triple stapled securities as at the close of business on 30 June 2021.

Cash Distribution Received

Any payments you received in cash during the statement period.

Reinvestment

If you elected to participate in the distribution reinvestment plan (DRP), the proceeds of your distribution were reinvested and used to purchase additional triple stapled securities.

Distribution Reinvestment Cash Balance

Any money left over after purchasing DRP units is held in a cash balance account. This amount will be added to your next distribution and put towards the purchase of additional triple stapled securities. If you exit the fund, this balance will be paid to you in cash.

Return on Investments

If you have not bought or sold TCL triple stapled securities during the reporting period, your statement will show your return on investments. This includes any capital return on your investment plus distributions paid during the reporting period. Otherwise your return on investment is not shown because we do not have access to information about securities you bought or sold during the period. You can obtain that information from your broker or financial advisor and seek their assistance to calculate the return.

Indirect costs of your investment (ICI)

This approximate amount has been deducted from your investment and includes amounts that have reduced the return on your investment but are not charged directly to you as a fee. Indirect Costs (IC) relate to TCL's Corporate function and the Corporate component of TCL's North American segment. IC totalled \$250 million and are inclusive of management and administrative expenses not directly allocated to the entities that operate toll roads. IC include depreciation and amortisation costs of \$146 million, that primarily relates to leased office space and back office systems. The IC do not include costs paid from one entity to another entity within the stapled group. ICI are determined using the IC ratio (ICR), which is calculated based on total IC and the average net assets of TCL for the period, resulting in an ICR of 2.51%. If ICI had been calculated based on total IC and average market value of TCL securities, the ICR would be 0.66%. The amount shown has been rounded to 2 decimal places.

Investment objectives

Please refer to the Transurban website (www.transurban.com) or the ASX website (www.asx.com.au) for announcements and other information relating to TCL's financial and other performance.
