We understand with regard to tax statements MSC engaged PWC for the Trust tax accounting for FY22 – they used the FX rate on March 2<sup>nd</sup> (allotment day) of 72.69c to attribute a value to the in-specie distribution of the above shares for each Trust of \$1.375705 per unit (a non-cash distribution for purposes of FY22 tax statements). We also understand from MSC that there was a capital gain on the currency movement for SQ Yield 1, which explains an additional delta between the FY22 statement distribution amount, and cash received + non-cash distribution of USQ units. I have forwarded your below query to MSC who will assist regarding the reconciliation query from your accountant. Note, we confirm the USQ IPO price was \$1.38.

#### Notes:

1.

2. 3.

All amounts are in Australian dollars and withholding tax has been deducted where applicable. Trustees may choose to show the franked distributions at label 13C rather than at label 13U. If your total foreign income tax offset from all sources for the year is \$1,000 or less, then you can claim this amount in full. Otherwise, you will need to refer to the publication Guide To Foreign Income Tax Offset Rules (NAT 72923) to work out your entitlement.

## Commonwealth Bank of Australia ("CBA") off-market share buy-back

Thank you for participating in the CBA off-market share buy-back (Buy-Back). We are pleased to confirm the successful completion of the Buy-Back and that CBA has bought back a total of 67.7 million Shares at a Buy-Back Price of \$88.62 per Share, which represents a discount to the Market Price of 14%.

As the total number of Shares offered for sale at the Buy-Back Discount of 14% and/or as a Final Price Application was greater than the number of Shares CBA determined to buy back, your Application may have been scaled back.

In accordance with the scale back process outlined in the Buy-Back booklet, a Priority Allocation of 100 Shares plus 20.6% of the remaining Shares offered at the Buy-Back Discount of 14% and/or as a Final Price Application have been bought back. Any Small Residual Holdings (20 Shares or less) as a result of the scale back process were also bought back in full.

For Shares that have been successfully bought back, you have received \$88.62 per Share. The Australian Taxation Office is expected to confirm in its Class Ruling that this payment represents a Capital Component of \$21.66 and a fully franked Dividend Component of \$66.96 per Share.

The details of your Shares bought back, which may need to be disclosed on your Australian income tax return, are shown in the table below. If applicable, you are now free to deal with your Shares that have not been bought back by CBA.

NOTE

The Total Fees and Charges amount shown in the Fees and Charges table in this statement does not include linked Cash Investment Account (CIA) or DIY Super Working account fees (as applicable). The Interest amount in the Interest and Estimated Dividends table in this statement shows the interest earned on funds held in your CIA or DIY Super Working account (as applicable). The Interest shown is

net of any non-resident or TFN withholding tax (if applicable). Please refer to your CIA or DIY Super Working account bank statements for full details of your account transactions, including fees, interest and amounts deducted for applicable taxes (if any).

(1) This is an estimate prepared by AUSIEX based upon units that you hold in accordance with our records. Your actual entitlement will be determined by whether or not a company's share registry shows you as owning shares at the relevant record dates. Amounts that may have been withheld for failing to provide your tax file number to your share registries are not disclosed on this report.

Dividends are estimated by AUSIEX based on the total registered Units held on the Record Date of the dividend. The following fields are estimated in accordance with the calculations outlined below:

(a) Units = Total registered units of security held on the Record Date of the dividend (b) Est. Unfranked Amount = Units X Dividend per security X Unfranked %

(c) Est. Franked Amount = Units X Dividend per security X Franked % (d) Est. Franking Credit = (Est. Franked Amount X company tax rate)/(100 - company tax rate)

(e) Est. Total Dividend = Units x Dividend per security

(2) If you have total franking credit amounts greater than \$5,000, in order to be eligible to claim the benefit of the franking credit, you must have held the security for at least 45 consecutive days, not including date of purchase and date of sale. Where the 45 day holding requirement has not been satisfied, the holding beriod rule (also known as the 45 day rule) may apply to deny the franking credits attached to the dividend received in respect of the particular security. If that situation applies to you please speak to your tax adviser.

Please refer to your dividend statement provided by the Share Registry for any foreign tax credits you may be entitled to and breakdown of any trust distribution you may have received.

For details of the components of your ASX listed trust distributions you will need to refer to the Annual Tax Statement issued by the trust manager.

(3) Interest payments are estimated by AUSIEX based on the total registered Units of security held on the Record Date of the interest payment. The following fields are estimated in accordance with the calculations outlined below:

(a) Units = Total registered units of security held on the Record Date of the interest payment
 (b) Face value = issue price or principal of the interest rate security
 (c) Est. Interest = Interest rate for the period X Face value X Units

GLOSSARY

Units

The number of registered securities that you own.

| Unit Price                         | The Portfolio Valuation 'Unit Price' is calculated using a 'Reference' Price provided by the ASX which takes into account an adjustment to determine value at Close of Market if the Security does not trade in the Closing Single Price Auction on the Valuation Date. The Unit Price in the Transaction Summary is the average price paid for each unit of stock as detailed in your contract note. |
|------------------------------------|---|
| Brokerage                          | The fee or charge that is paid by you when transacting a buy or sell.   |
| Holder Identification Number (HIN) | When you are CHESS sponsored with a Broker you will be issued a unique number, called a HIN. Multiple holdings can be registered under the single HIN. A HIN starts with the letter X and usually followed by 10 numbers, e.g. X0001234567.   |
| Dividend                           | A dividend is a payment made to shareholders from the company. This payment is a portion of the company's profits. ASX listed companies typically pay dividends twice a year, usually as an 'interim' dividend and a 'final dividend'. From time to time, a company may also pay a 'special' dividend.  |
| Ex-dividend date                   | The ex-dividend date occurs two business days before the company's Record Date. To be entitled to a dividend a shareholder must have purchased the shares before the ex-dividend date. If you purchase shares on or after that date, the previous owner of the shares (and not you) is entitled to the dividend.  |
| Interim dividend                   | A dividend paid during a year representing a return based on the previous six months' financial performance and the outlook for the future.   |
| Final dividend                     | A dividend paid during a year representing a return based on the previous twelve months' financial performance.   |
| Special dividend                   | A dividend paid by the company outside typical recurring (interim and final) dividend cycle.  |
| Record date                        | The record date is the date the share registries use in determining who is entitled to a dividend or entitlement associated with a security. Those who held the security in the company and were on the register on the record date are eligible for the entitlement.   |
| Payment date                       | The date on which a declared dividend is scheduled to be paid.  |
| Unfranked dividend                 | Dividends which do not carry a franking credit.   |
| Franked dividend                   | Franked dividends are paid to security holders out of profits on which the company has already paid tax.  |
| Franking /Imputation Credit        | A franking credit is your share of tax paid by a company on the profits from which your dividend are paid. They are also known as Imputation Credits.   |
| Total subscriptions                | Total subscriptions can include, but are not limited to: Trader Pro fees, Morningstar research subscription fees and trading alerts.  |
| Other fees                         | Other fees can include, but are not limited to: Off market transfer fees, conditional trading fees (added as brokerage), rejection fees, early and late settlement fees, fail fees, SRN query, rebooking fees, cheque payment fee or cheque dishonour fees and the printing and posting of contract notes.  |
| Corporate action (CA)              | Any action initiated by the company or corporation, for the purpose of giving an entitlement to shareholders.   |

## DAVIDSON SUPERANNUATION FUND Investment Strategy

#### Overview

The aim of this strategy is to provide the Members with an income on retirement.

#### Investment Objectives

The Trustee(s) will at all times ensure the funds assets are invested in accordance with the trust deed and comply with the applicable legislative requirements.

The Trustee(s) will act prudently to maximise the rate of return, subject to acceptable risk parameters whilst maintaining an appropriate diversification across a broad range of assets whilst assessing the risks where it is determined the fund's portfolio lacks diversification and / or has elected to implement a sector bias.

Having considered the risk profile of the fund and the member's needs and circumstances, the trustee has adopted the following objectives for the investment of assets of the fund;

- to achieve an investment return (based on market values and net of tax and charges) that exceeds the CPI by at least 3% per annum when measured over a rolling 5 year period.
- to have a probability of zero or negative returns in any 12 Month period of less than one in five years; and
- have sufficient liquidity to meet liabilities as and when they fall due.
- to consider the need to hold a policy of insurance for one or more members of the fund.

#### a to achieve a fassive income stream
