Users should be aware of the existence of section 115-45 which potentially denies the CGT discount concession upon the sale of shares in a company or interest in a trust where the taxpayer would not have been allowed CGT discounting on the majority of the CGT assets by cost and value in the company or trust had a CGT event happened to those assets.

Note the pre offset Gain has been grossed up before any losses are applied.

Accordingly, an amended assessment from the Australian Taxation Office may need to be requested for the prior year to reduce the CGT event D2 capital gain that arose in the prior year.

In relation to the options, the unrealised CGT report covers possible CGT consequences that may eventuate if the options are traded on an active market or the options are closed out.

the cost base of the underlying security also includes the market value of the right or option at the exercise date. The automated system for rights and options will only include the consideration paid to acquire the security in its cost base. Holders of rights or options issued in respect of pre-CGT securities, who take up their entitlement to purchase the underlying security, should ensure that in addition to the consideration paid for this security,

Corporate Shareholders and Share Buybacks

Corporate shareholders i.e. companies who make a CGT toss as a result of a share buyback may have that loss denied or reduced as a result of section 159GZZZQ of the Income Tax Assessment Act 1936. The automated system for input of share buybacks does not take into account this provision. Shareholders to whom this provision applies should obtain their own taxation advice.

Income Declared but not Paid Report

An Income Declared but not Paid Report is available to show income that has been declared but not yet paid, as at a given date. For ASX-listed Financial Products, this is the distribution date. The ex-dividend entitlement aspects will be reported in your portfolio. Only actual dividends received are in the

Indexed cost base with tax deferred distributions

When calculating the indexed cost base of units, the cost base needs to be indexed up until the date that a tax deferred distribution is received. The indexed cost base then needs to be reduced by the tax deferred distribution received and the adjusted indexed cost base is taken to be the 'new' cost base. Currently, upon disposal, the report applies indexation to the full acquisition cost and then adjusts the cost base for any tax deferred distributions. Please refer to the Tax Free and Tax Deferred Summary page for details of tax deferred distributions. Please note that only assets purchased at least 12 months prior to 21 September 1999 with tax deferred distributions will be affected

Instalment Warrants and Instalment Receipts

With regard to instalment warrants and instalment receipts, the tax reports display the dividend and/or trust distribution of the underlying security only. The reports do not disclose any attaching options details or expenses and/or interest payments made by you in respect of these instruments.

Superannuation Funds - Assets held at 30/06/1988

Important Client Notices

Assets held by superannuation funds at 30 June 1988 including those acquired before 19 September 1985 are subject to special transitional measures that mean the assets are deemed to have been acquired on 30 June 1988. For these assets, the capital gain or loss that is realised upon disposal may be impacted by the market value of the asset at 30 June 1988. The automated system for calculating capital gains tax will only take into account the cost of the asset, not the market value as at 30 June 1988. To override the cost base with the market value, the cost base for the parcels can be edited in the Transaction screen. Holders to whom these transitional measures apply should obtain their own taxation advice.

Tax Free and Deferred Adjustments to Cost Base

When calculating capital losses, tax free and tax deferred amounts will always be treated as a reduction in the reduced cost base. As not all tax free amounts should be treated as a reduction in the reduced cost base, holders should consult with their professional tax advisers to ensure the correct amounts are included in the reduced cost base.

Users need to seek independent taxation advice in relation to the application of the report.
