Portfolio valuation

As at 30 Jun 2021

(a) Estimated income

This estimation is based on historical returns and should not be regarded as an accurate indication of future earnings.

(b) Estimated yield percentage

The estimated yield is the estimated income as a percentage of the market value.

(a) Variances between Adjusted cost and Actual cost

Where the 'Sale proceeds' in respect of the CGT parcel are equal to or less than its reduced cost base, its reduced cost base is disclosed as the adjusted cost; otherwise, its cost base is disclosed as the adjusted cost. For more details, refer to the 'Adjusted cost' subsection in this report.

(b) Gains calculated using discounted method

The capital gain calculated using the discount method, after having applied the 33.33% CGT discount rate appropriate to the tax entity type of this portfolio.

M1607270: Castle View Super Fund

Realised CGT

01 Jul 2020 to 30 Jun 2021

(c) CGT gain calculation method

The CGT gain is calculated based on what is optimal for the disposal method selected. In some cases the indexed gain is used to optimise the use of losses. The CGT gain calculated from a less than optimal method is shown in italics for information purposes only and is excluded from the totals for the portfolio. NA is shown if a calculation method is not applicable.

Trust CGT distributions

There were no trust CGT distributions within the period.

Summary of CGT gains/losses

		Total \$	Discounted \$	Indexed \$	Other \$
Losses available to offset	Carried forward from prior years	-			
	Current year losses	-72,278.16			
	Total	-72,278.16			
CGT gains	Disposals of CGT assets	224,931.63	177,200.27	-	47,731.36
	Trust CGT distributions	-	-	-	-
	CGT gain before losses applied	224,931.63	177,200.27	-	47,731.36
	Losses applied	-72,278.16	-24,546.80	-	-47,731.36
	CGT gain after losses applied	152,653.47	152,653.47	-	-
	Discount applied ^(a)	-50,884.49	-50,884.49	NA	NA
Net capital gain		101,768.98	101,768.98	-	-

(a) The 'CGT gain after losses applied' amount multiplied by a 33.33% CGT discount rate appropriate to the tax entity type of the portfolio.

(a) Variances between Adjusted cost and Actual cost

Where the 'Market value' in respect of the CGT parcel is equal to or less than its reduced cost base, its reduced cost base is disclosed as the adjusted cost; otherwise, its cost base is disclosed as the adjusted cost. For more details, refer to the 'Adjusted cost' section of the Unrealised report.

(b) Gains calculated using discounted method

The unrealised 'CGT gain' calculated using the discount method, after having applied the 33.33% CGT discount rate appropriate to the tax entity type of this portfolio.

M1607270: Castle View Super Fund

Unrealised

As at 30 Jun 2021

(c) CGT gain calculation method

The CGT gain is based on what is optimal for the disposal method selected.

The CGT gain calculated from a less than optimal method is shown in italics for information purposes only and is excluded from the totals for the portfolio.

NA is shown if a calculation method is not applicable.

(d) Unrealised CGT gain or CGT loss

The unrealised CGT gain or CGT loss is the difference between the adjusted cost and the market value at the date requested. For short options, the unrealised CGT gain or CGT loss is the market value of the option at the date requested. (The option premium received is shown as a realised CGT gain in the 'Realised CGT' section.)

CGT gains or CGT losses are not comparable with performance gains/losses, which are based on changes in value for a performance period.

Adjusted cost

Asset	Market value				Adjustments					Adjusted cost ^(a)	
					Actual cost ^(b)	Tax deferred ^(c)	Tax free ^(d)	AMIT cost base net amount - excess ^(e)	AMIT cost base net amount - shortfall ^(f)	Cost base ^(g)	Reduced cost base ^(h)

Totals	68,730.41				70,000.00	65.09	-	-	-	69,934.91	69,934.91

(a) Where the 'Market value' of the CGT parcel is equal to or less than its reduced cost base, its reduced cost base is disclosed as the adjusted cost in the 'Unrealised CGT gains/losses' section of the Unrealised report; otherwise, its cost base is disclosed as the adjusted cost in the 'Unrealised CGT gains/losses' section of the **Unrealised** report.

(b) The actual cost of the CGT parcel is its purchase cost, adjusted for all CGT events (other than CGT events E4 and E10) that have happened to it. For more details, refer to the **Transaction history** report. For details specific to CGT event E4, refer to footnotes (c) and (d). For details specific to CGT event E10, refer to footnotes (e) and (f).

(c) In respect of the income entitlements of a fixed trust that was not an attribution managed investment trust (a non-AMIT) at the time of the entitlement, the tax-deferred amount is the cumulative value of tax-deferred amounts (being the non-assessable part of the income entitlements, excluding all amounts calculated under section 104-71 ITAA 1997) in respect of the CGT parcel that, at the time of the income entitlement, did not exceed the CGT parcel's cost base. CGT event E4 requires that both the cost base and reduced cost base of the CGT parcel be reduced by this amount.

(d) In respect of the income entitlements of a fixed trust that was not an attribution managed investment trust (a non-AMIT) at the time of the entitlement, the tax-free amount is the cumulative value of tax-free amounts (being the non-assessable part of the income entitlements as calculated under subsection 104-71(3) ITAA 1997) in respect of the CGT parcel that, at the time of the income entitlement, did not exceed the CGT parcel's reduced cost base. CGT event E4 requires that the reduced cost base of the CGT parcel be reduced by this amount.

(e) In respect of the income entitlements of an attribution managed investment trust (AMIT), the AMIT cost base net amount - excess amount is the cumulative value of excess amounts (as calculated under paragraph 104-107C(a) ITAA 1997) in respect of the CGT parcel that, at the time of the income entitlement, did not exceed the CGT parcel's cost base. CGT event E10 requires that both the cost base and reduced cost base of the CGT parcel be reduced by this amount.

(f) In respect of the income entitlements of an attribution managed investment trust (AMIT), the AMIT cost base net amount - shortfall amount is the cumulative value of shortfall amounts (as calculated under paragraph 104-107C(b) ITAA 1997) in respect of the CGT parcel. CGT event E10 requires that both the cost base and reduced cost base of the CGT parcel be increased by this amount.

(g) The cost base equals the actual cost, adjusted for amounts relating to: tax deferred; AMIT cost base net amount - excess; and AMIT cost base net amount - shortfall.

(h) The reduced cost base equals the actual cost, adjusted for amounts relating to: tax deferred; tax free; AMIT cost base net amount - excess; and AMIT cost base net amount - shortfall.

Unrealised non-CGT gains/losses

There were no unrealised non-CGT gains/losses as at 30 Jun 2021.

Important notices

General notices

This report is NOT intended to be advice

The information provided on this report is not intended to influence any person in making a decision in relation to a particular financial product, class of financial products, or any interest in either. Taxation is only one of the matters that must be considered when making a decision in relation to a financial product. However, to the extent that advice is provided on this report, it does not take into account any person's particular objectives, financial situation or needs. These should be considered to determine the appropriateness of the advice, before acting on it.

Taxation

+ EMUPLAINS & +EMUVAL

The components could not be updated as no tax statements were available for these investments.

CGT for Exchange Traded Options (ETO's)

When the writer grants an option, the premium received represents a capital gain pursuant to CGT event D2 (except if the writer is the company granting the options over its own shares or debentures or by the trustee of a unit trust over its own units or debentures). Also, there is no discount on capital gain pursuant to CGT event D2 (applicable to any entity). Should the option subsequently be exercised, the capital gain that the grantor would otherwise have made from writing the option under CGT Event D2 mentioned above is disregarded. The premium however, will be recognised when calculating the subsequent disposal of the underlying shares CGT Event A1 either as: • A reduction in the cost base of the underlying asset in the case of a put option or • Part of the capital proceeds in the case of a call option upon disposal of the shares by the grantor. Accordingly, an amended assessment from the Australian Taxation Office may need to be requested for the prior year to reduce the CGT event D2 capital gain that arose in the prior year. In relation to the options, the unrealised CGT report covers possible CGT consequences that may eventuate if the options are traded on an active market or the options are closed out.

Company Options and Rights on Pre CGT Assets

Holders of rights or options issued in respect of pre-CGT securities, who take up their entitlement to purchase the underlying security, should ensure that in addition to the consideration paid for this security, the cost base of the underlying security also includes the market value of the right or option at the exercise date. The automated system for rights and options will only include the consideration paid to acquire the security in its cost base.

Corporate Shareholders and Share Buybacks

Corporate shareholders i.e. companies who make a CGT loss as a result of a share buyback may have that loss denied or reduced as a result of section 159GZZZQ of the Income Tax Assessment Act 1936. The automated system for input of share buybacks does not take into account this provision. Shareholders to whom this provision applies should obtain their own taxation advice.

Foreign Income Tax Offsets on Foreign Listed Securities

For dividends paid to Australian residents on foreign listed securities, foreign income tax offsets will be calculated based on the tax treaty between Australia and the security's country of domicile. For countries that do not have a current tax treaty with Australia, the default rate will be applied. A foreign income tax offset is only calculated and reported on dividends where the gross dividend rate has been received from the data provider. If the dividend rate is received net or free of tax rate, no foreign income tax offset will be applied. Clients should also seek their own taxation advice where required.

Section 115-45. CGT Discounting

Users should be aware of the existence of section 115-45 which potentially denies the CGT discount concession upon the sale of shares in a company or interest in a trust where the taxpayer would not have been allowed CGT discounting on the majority of the CGT assets by cost and value in the company or trust had a CGT event happened to those assets. Clients to whom this situation applies should also seek their own taxation advice.

Superannuation Funds - Assets held at 30/06/1988

Assets held by superannuation funds at 30 June 1988 including those acquired before 19 September 1985 are subject to special transitional measures that mean the assets are deemed to have been acquired on 30 June 1988. For these assets, the capital gain or loss that is realised upon disposal may be impacted by the market value of the asset at 30 June 1988. The automated system for calculating capital gains tax will only take into account the cost of the asset, not the market value as at 30 June 1988. To override the cost base with the market value, the cost base for the parcels can be edited in the Transaction screen. Holders to whom these transitional measures apply should obtain their own taxation advice.
