Annual statement for financial year to 30 June 2022

Dear The Trustees of AUSTITALIA INVESTMENT & SPECIALISED ROOFING SYSTEMS SUPERANNUATION FUND,

We are pleased to provide your periodic statement for your investments held in the Morgan Stanley SMA account. All figures, information and illustrations are as at 30 June 2022 unless otherwise stated.

This statement contains the following for the period 1 July 2021 to 30 June 2022:

- » Portfolio performance
- » Portfolio valuation (as at 30 June 2022)
- » Investment movements (summary of transactions)
- » Additions and withdrawals
- » Fee amounts summary

Your annual statement is not your tax report. This will be sent to you separately and will contain information to help complete your 2021-2022 tax return.

Sincerely,

Anna Itsiopoulos

Chief Operating Officer
Praemium Australia Ltd

Gain/loss

The gain/loss is the net of the realised and unrealised gain/loss for the performance period. The gain/loss for short options will include a realised gain from the option premium received within the period.

The performance gain/loss is different from the gain/loss shown in valuation or taxation reports, which is calculated using the original cost base at a tax lot level.

Please note, accurate gain/loss reporting is dependent on the provision of complete and accurate cost information across the portfolio.

Total return amount for investments

This is the total dollar return based on the realised and unrealised Gain/loss for the period before expenses, plus income and franking credits accrued. Investment movement amounts are included on an accrual basis, net of transaction costs such as brokerage.

Percentage investment returns

The percentage return for each investment is before expenses and has been calculated using the approximate return method. This method calculates the percentage total return by dividing the total return amount by the starting market value plus net investment movements within the performance period. If the ending value is zero, the total return amount including franking credits is just divided by starting value.

The percentage return attributable to income is the sum of total income and franking credits divided by the starting value plus the net of investment movements, expressed as a percentage.

The percentage capital return, which is the percentage return attributable to the investment's realised and unrealised Gain/loss, is the total percentage return minus the percentage income return.

Past performance is not an indication of future performance.
