## INVESTMENT STRATEGY

The investment strategy is the method chosen by the trustees in order to achieve these investment objectives.

The investment strategy of the fund comprises of the following asset allocations:

Domestic Shares	45 - 85%	75%
International Shares	0 - 20%	0%

0-85%

0-85%

These ranges are purely indicative and the trustees may vary the allocations at any time if satisfied that the current market conditions or the fund's circumstances warrant such a change. If the trustees wish to invest outside these parameters, the investment strategy of the fund must be revised in writing and all decisions minuted.

**Caution: It is noted that any breaches of the fund's investment strategy may result in the trustees being fined or sued for loss or damages. The fund could also lose its complying fund status.**

In arriving at this investment strategy, the trustees considered:

- Ability of the fund to discharge its liabilities.
