## Investor Information

### Return on Investment

This includes the capital return on your investment (net of any entry/exit fees), plus any distributions paid during the reporting period. Return on investment is not shown when off-market transactions occur during this time.

### Termination Value

The amount you would have received if you requested a full withdrawal at the end of the period, taking into account any applicable exit fees.

### Direct Fees

Represents fees directly deducted from your investment account during this period as shown under the Fund Transactions section of your statement.

### Indirect Costs

Indirect costs have the effect of reducing the value of your investment, even though the cost is not charged to you directly as a fee. There are different types of indirect costs. They include amounts payable out of the Investment Fund to the responsible entity; amounts paid out of the Investment Fund to service providers (such as managers, custodians and administrators); and some of the costs incurred by the Investment Fund investing in a derivative. Indirect costs also include similar amounts incurred in underlying entities where the Investment Fund has invested into the underlying entity in order to gain exposure to another asset or investment. This is not an exhaustive list of the types of indirect costs. The particular types of indirect costs that apply to your investment will depend on a number of factors, including the assets held in the Investment Fund. Some of the different types of indirect costs are based on estimates which is why the amount in this statement is stated to be an approximate amount.

### Total Fees You Paid

This approximate amount includes all the fees and costs which affected your investment during the period. Please refer to the latest Product Disclosure Statement for full details of fees or costs which affect your investment.
