Management costs are calculated using an estimate of the Indirect Cost Ratio (ICR). The ICR is calculated by dividing the fund's management costs and expenses by its average net assets. Further, any performance fee paid over the term of the fund is included in the management cost. Accrued management costs and expenses may increase or decrease over time before they are actually paid. As a result, the "Total Fees Paid" is likely to be different to the fees paid, as the calculation is based on the amount of performance fees paid and an estimate of management costs and expenses fees accrued (which generally affects the unit price).

This is not a statement for tax purposes. We have sent you a separate statement which contains all the information about your investment that you need to complete your tax return.

The disposal proceeds and/or acquisition costs have been calculated based on the published unit price and may not reflect the amount that you have paid or received for your units, and therefore may not reflect your actual return.
