I understand that for the financial year I need to withdraw from my account based pension at the minimum level at 3% because I am over 75 years old. My opening account balance at the start of the financial year was \$881,009 and I understand that the minimum I need to be paid is \$26,431

I understand that in the 2022 financial year, this amount will revert to 6% of the balance of my account for the 2023 financial year which is double the amount of the 2022 financial year this would be approximately \$53,000 to be withdrawn in the 2023 year or \$4,405 per month

Thank You
