Note 1: Summary of Significant Accounting Policies

Basis of Preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standard AASB 1056: Superannuation Entities, other applicable Accounting Standards, the provisions of the trust deed and the requirements of the Superannuation Industry (Supervision) Act 1993 and associated Regulations. The Fund is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

International Financial Reporting Standards (IFRSs) form the basis of Australian Accounting Standards adopted by the Australian Accounting Standards Board. The financial statements of the Fund do not comply with IFRSs due to the requirements of AASB 1056.

The financial statements, except for the cash flow information, have been prepared on an accruals basis and are presented in Australian dollars, being the functional currency of the Fund. The amounts presented in the financial statements have been rounded to the nearest dollar. Material accounting policies adopted in the preparation of these financial statements are presented below and have been consistently applied unless stated otherwise.

a. Fair Value of Assets and Liabilities

The Fund measures its assets and liabilities (except tax and insurance-related items, employer-sponsor receivables and member benefits) at fair value through profit and loss on a recurring basis.

Fair value is the price the Fund would receive to sell an asset or would have to pay to transfer a liability in an orderly (ie unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset or liability. The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset or liability (ie the market with the greatest volume and level of activity for the asset or liability) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (ie the market that maximises the receipts from the sale of the asset or minimises the payments made to transfer the liability, after taking into account transaction costs and transport costs).

Based on the above approach, fair values of investments have been determined as follows:

- (i) shares in listed companies, government securities and corporate bonds by reference to the relevant market quotations at the end of the reporting period;
- (ii) mortgage bonds through the income approach using the discounted cash flow techniques; and
- (iii) units in managed funds by reference to the unit redemption price at the end of the reporting period.

Other assets and liabilities, which are all current in nature, are carried at the gross value of the outstanding balances of amounts due to be received or paid, which represents their fair value.

b. Financial Instruments

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions to the instrument. For financial assets, this is equivalent to the date that the entity commits itself to either the purchase or sale of the asset (ie trade date accounting is adopted).

Financial instruments (except for trade receivables) are initially measured at fair value plus transaction costs, except where the instrument is classified "at fair value through profit or loss", in which case transaction costs are expensed to profit or loss immediately. Where available, quoted prices in an active market are used to determine fair value. In other circumstances, valuation techniques are adopted.

Notes to the Financial Statements

For the year ended 30 June 2022

Derecognition of financial instruments

Derecognition refers to the removal of a previously recognised financial asset or financial liability from the statement of financial position.

Derecognition of financial assets

A financial asset is derecognised when the holder's contractual rights to its cash flows expires, or the asset is transferred in such a way that all the risks and rewards of ownership are substantially transferred.

Derecognition of financial liabilities

A liability is derecognised when it is extinguished (ie when the obligation in the contract is discharged, cancelled or expires). An exchange of an existing financial liability for a new one with substantially modified terms, or a substantial modification to the terms of a financial liability, is treated as an extinguishment of the existing liability and recognition of a new financial liability.

c. Liability for Members' Accrued Benefits

The liability for members' accrued benefits represents the Fund's present obligation to pay benefits to members and beneficiaries, and has been measured as the amount of member account balances as at the reporting date.

d. Members' Vested Benefits

Members' Vested benefits are benefits that are not conditional upon continued membership of the Fund and include benefits that members are entitled to receive had they terminated their membership of the Fund at the end of the reporting period.

e. Other Payables

Other payables include trade debtors and benefits payable. Other payables are payable on demand or within a short timeframe of less than 60 days.

f. No Tax File Number (TFN) Contributions Tax

Where a member's TFN is not provided to the Fund, the Fund may be required to pay no-TFN contributions tax at a rate of 32% on contributions received from and on behalf of the member. The no-TFN contributions tax applies in addition to the concessional contributions tax rate of 15% applicable to such contributions.

A no-TFN contributions tax liability recognised by the Fund will be charged to the relevant member's account. Where a tax offset is obtained by the Fund in relation to the member's no-TFN contributions tax liability, the tax offset will be included in the relevant member's account.

g. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and at call, deposits held at call with banks and short-term, highly liquid investments that are readily convertible to cash and are subject to an insignificant risk of changes in value.

h. Revenue

Revenue is recognised at the fair value of the consideration received or receivable.

Interest revenue

Interest revenue is recognised using the effective interest method, which for floating rate financial assets is the rate inherent in the instrument.

Interest income includes the amortisation of any discount or premium, transaction costs and any other differences between the initial carrying amount of the interest-bearing instrument to which it relates and the amount of the interest-bearing instrument at maturity calculated on an effective interest rate basis.

Notes to the Financial Statements

For the year ended 30 June 2022

Dividend revenue

Dividend revenue is recognised on the date the shares are quoted ex-dividend and, if not received at the end of the reporting period, is reflected in the statement of financial position as a receivable at fair value.

Distribution revenue

Distributions from managed investment schemes are recognised as at the date the unit value is quoted ex-distributions and, if not received at the end of the reporting period, are reflected in the statement of financial position as a receivable at fair value.

i. Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

Where the Fund retrospectively applies an accounting policy, makes a retrospective restatement or reclassifies items in its financial statements, a third statement of financial position as at the beginning of the preceding period, in addition to the minimum comparative financial statement, is presented.

j. Critical Accounting Estimates and Judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future period affected.
