Dear Securityholder

Please find enclosed your Annual Tax Statement along with a summary of highlights.

The 2020-2021 financial year will go down as one of the most memorable. It seemed that almost every type of investment got a win in. Gold won early, as investors fled risk assets and sought safety. The FANG tech giants – Facebook, Amazon, Netflix, Google – won second, as social distancing fed greater internet use. Environmental businesses, like battery technology, won third as investors took stock of the future of our planet. Then everything else – property, European shares, value stocks – rallied too as the global vaccine roll out brought cities back to life. The result was global stock markets in June 2021 were at all-time highs.

Thank you for your support of ETF Securities and we look forward to continuing to provide you with “intelligent alternative” ETF investments for your portfolio in the coming year.

Yours sincerely

ETFS Management (AUS) Limited

Product in Spotlight

Top Performer

ETFS Battery Tech & Lithium ETF (ACDC)

- The Australian Financial Review found our battery technology ETF was the best performing ETF in Australia for the year up to June 2021.

A Guide To The Information Provided In Your Tax Statement

Part A – What do you do with the amounts that appear in part A

Your annual taxation statement has been designed so that the amounts in Part A correspond to the amounts you are required to enter into your 2021 Tax Return for Individuals (Supplementary Section) and includes the distribution components from your investments that are relevant for the completion of your Australian tax return.

Part B – What information makes up the distribution components

Part B of your annual tax statement provides information relating to the components of the distributions you have received with respect to the financial year. Information relating to each component is provided in the notes below.

Australian income components

Note 1 – Dividends – Unfranked	This is your share of Australian source unfranked dividends. No franking credits are attached to these dividends.
Note 2 – Interest	This income relates to interest earned on amounts such as cash or fixed interest on securities held in Australia.
Note 3 – Other income	Other income is any other income from Australian sources (excluding capital gains) that is taxable. This includes rental income from direct or indirect property investments.
Note 4 – Dividends – Franked	This is your share of franked dividends. Your share of franking credits in relation to franked dividends is provided in the “Tax Paid or Tax Offsets” column. Although you do not receive the franking credits in cash, you must include them as part of your assessable income in your tax return. However, you may be entitled to tax offsets to reduce your income tax payable or give you a tax refund.

Capital gains

Note 5 – Discounted capital gains TAP Note 6 – Discounted capital gains NTAP	Discounted capital gains are gains on the disposal of investments that have been held by the fund for at least 12 months. The gains have been reduced by 50 per cent as a result of the CGT discount. These amounts are included in your tax return as part of the “net capital gain” amount at Item 18A.
Note 7 – CGT concession amount TAP Note 8 – CGT concession amount NTAP	This amount comprises the non-assessable CGT discount amount paid to you. This amount does not need to be recorded in your tax return and an adjustment to the cost base of your units is not required.
Note 9 – Capital gains-indexation method TAP Note 10 – Capital gains-indexation method NTAP	Capital gains – indexation method shows the part of the capital gains where the indexation method has been applied. This amount is included in your tax return as part of the “net capital gain” amount at Item 18A.
Note 11 – Capital gains – other method TAP Note 12 – Capital gains – other method NTAP	Capital gains – other method shows other capital gains where the discount method has not been applied (such as for CGT assets held by the fund for less than 12 months). These amounts are included in your tax return as part of the “net capital gain” amount at Item 18A.

Foreign income

Note 13 – Assessable foreign source income	Assessable foreign source income is income that is derived from a foreign source.
---	---

Other non-assessable amounts

Note 14 – Tax free amounts	Tax free amounts relate to non-assessable amounts which are not required to be included in your tax return. Distribution of a tax-free amount should not reduce the cost base of your units in the fund for the purposes of calculating a capital gain but should generally reduce the reduced cost base when calculating a capital loss.
Note 15 – Tax deferred amounts	Tax-deferred amounts are usually not assessable for income tax purposes and are therefore not included in your tax return. Details of tax-deferred amounts received should be retained for CGT purposes as you will need to reduce the cost base of your units by the tax-deferred amount. Tax-deferred amounts received are not assessable when received unless (or until) the total tax-deferred amounts received exceed the cost base of your investment, at which point in time the excess amounts are treated as capital gains.
Note 16 – Tax exempt amounts	Tax exempt amounts relate to non-assessable amounts which are not required to be included in your tax return. Distribution of a tax exempt amount should not reduce the cost base or reduced cost base of your units in the fund when calculating a capital gain or capital loss respectively.
Note 17 – Return of capital	Return of capital amounts are generally treated in the same manner as tax-deferred amounts.
Note 18 – TFN/ABN amounts withheld	If you have not provided a TFN, ABN or exemption for your investment, withholding tax at the highest marginal rate (including Medicare Levy) of 47 per cent has been deducted. You should record the total amount detailed at “Share of Credit for TFN/ABN amounts withheld” at Item 13R. When non-taxable/assessable components have had TFN/ABN Withheld, then you may be required to fill in the following form to claim back the TFN withholding amounts. Use form NAT1846 available for download from www.ato.gov.au .

What information makes up additional capital gains information

There are three methods that may be used to calculate a capital gain: the indexation method, the discount method and the ‘other’ method.

These items provide tax figures for the break up of label 18H as shown in Part A of your tax statement. If you have an amount in the net capital gain label in Part A of your tax statement, you should obtain a copy of the Australian Taxation Office publication “Personal Investors Guide to Capital Gains Tax 2021” or “Guide to Capital Gains Tax 2021” for further details. This can be downloaded from the ATO website at www.ato.gov.au.

The information set out above relates to the items contained in the taxation statement for ETFs ROBO Global Robotics and Automation ETF which is managed by ETFs Management (AUS) Limited. This information is intended to assist you in filling out your individual tax return in respect of your investment in the ETFs ROBO Global Robotics and Automation ETF and has no regard to your current personal financial position.

ETFs Management (AUS) Limited does not provide taxation advice and this document does not constitute personal taxation advice. You should consider your personal financial position. If you have any doubt about your tax position, or if you require any further information about your tax affairs or the completion of your tax return, we recommend you speak to your accountant or tax adviser.

Attribution Managed Investment Trust Member For Year Ended 30 June 2021

HIN: X0079395200

The following tax return items are valid for Australian resident individual unitholders only.
