Variation in bills

Albury City Council bills reflect water consumption over the financial year. Bills are issued in November, March and July. Residents who consume a lot of water may find their largest bills are in March and July. This is because the first 225 kilolitres consumed is charged at \$1.41 per kilolitre for Residential properties. Any further water consumed is charged at a higher rate. Customers wishing to manage large variations in water bills are reminded that they may make advance payments at any time, or regular direct debit payments.

Restriction and disconnection of supply

If you are having difficulties paying your water bill please call 02 6023 8111 to discuss payment options with a customer service representative.

Albury City Council, as a water authority, has the right to restrict or disconnect the water supply to properties with outstanding accounts or where they are wilfully wasting water.

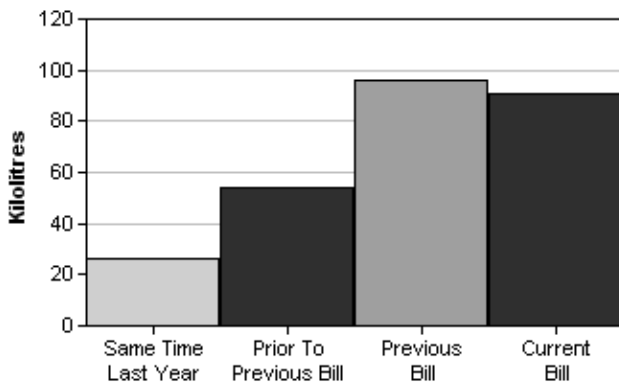

Pensioner Concessions

If you receive a pension from Centrelink or the Department of Veterans' Affairs and you have a pensioner concession card issued by the Commonwealth Government then you may be eligible for a concession on your water account. Please call customer service on 02 6023 8111 or visit our website alburycity.nsw.gov.au to download a pensioner concession application form.

Important message

The biller reference code on this account differs to that on your rate notice. Please use correct biller code and reference number when making payment otherwise accounts may attract interest charges and/or legal costs.

Your Water Consumption Summary

Note: Properties with a shared meter/s show total consumption.

FEES AND CHARGES - 1 JULY 2021 TO 30 JUNE 2022

Non-residential properties

Please visit our website alburycity.nsw.gov.au/water for details on water, sewer and trade waste charges that apply to businesses, caravan parks, moveable dwellings and other properties that are deemed by legislation to be non-residential properties.

Residential properties

Water consumption charges

Water bills reflect consumption over the financial year.

(1 kilolitre = 1,000 litres)

\$1.41 per kilolitre: First 225 kilolitres

\$2.35 per kilolitre: 226 kilolitres – 19,999 kilolitres

\$1.90 per kilolitre: More than 19,999 kilolitres

Water access charge

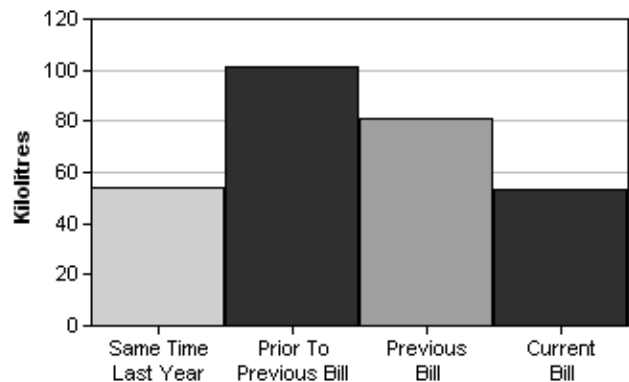

The annual fee of \$139.20 is divided evenly across the three water bills issued each year. It applies to all properties within 225m of the nearest water main, including individual units and flats.

Sewerage service charge

The annual fee of \$713.25 is divided evenly across the three water bills issued each year. It applies to all properties including individual units and flats.

Properties that are not connected to the sewerage system but are within 75m of the nearest sewer main are charged an annual fee of \$140.40 which is divided evenly across the three water bills issued each year.

AlburyCity Average Consumption for Single Residential Dwellings

Experiencing financial hardship - call our Customer Service Centre on 02 6023 8111.

Albury City Council accepts no responsibility for the late processing of your account.

Wise up as it warms up

As temperatures start to soar, water use in and around the home tends to rise. But even in these hot, dry conditions there are many big and small ways to be water wise at home.

Being water wise is simple. Turn over to find heaps of helpful tips to save water and money at your place.

AlburyCity

Water Wise Tips

INSIDE THE HOME

Capture water from your tap while waiting for it to warm up when running the shower, bath or sink. Use it to water your garden and indoor plants.

Set the timer for a 5 minute shower. If you've got littlies - consider sharing your shower with them to halve the water you use!

Turn the taps off properly and fix dripping taps as soon as you notice them. While you're locating the spanner, capture that dripping water for your garden or indoor plants. A dripping tap can add up to 600 litres of water to your water bill each day.

Use the half flush and save over 30,000 litres per year. If your toilet isn't a dual flush, consider putting a brick into the cistern to reduce the amount of water used each flush.

Turn off the tap when brushing your teeth. This supports the Australian Dental Association's recommendation to brush teeth for two minutes morning and night, and spit rather than rinse out toothpaste, for longer-lasting protection.

OUTSIDE THE HOME

Water your garden between 5pm and 10am to minimise evaporation. Watering thoroughly, less frequently helps encourage root systems downward, making your garden more resilient during hot, dry spells.

Set your mower to a higher level in summer. A longer lawn needs less water, provides more shade for your soil and reduces evaporation.

Mulch garden beds to help soil retain moisture. Before watering, push aside the mulch and stick your finger into the soil - if it's moist below the surface there's no need to water.

Use trigger operated nozzles on hoses so you can turn off the water between plants. When cleaning outdoor areas such as driveways and paths, put the hose away and use a broom instead.

Use a pool cover to reduce water evaporation from your pool by 40% - 90%, depending upon the type of cover you use.
