Order actuarial certificate Illustration of fund liabilities for 2022

The chart above illustrates the periods of the year the Fund had segregated pension assets, and the periods of the year where the Fund also had a non-retirement phase account and so was not segregated. This chart is based on the information provided on the Accurium application form.

We may require some additional information in order to correctly calculate the Fund's exempt income proportion if the Fund has segregated pension assets, and this will be requested in the 'Segregation' section below.

Segregation

You have indicated that this Fund is not eligible to use the segregated method in the selected financial year. The Fund must use the proportionate method to claim ECPI. The exempt income proportion provided by the actuarial certificate will apply to all income.

Draft tax exempt income / taxable income proportions

This actuarial certificate is issued in respect of the full financial year. The tax exempt income proportion will apply to the income earned on fund assets which were not segregated assets in the selected financial year.

The draft tax exempt income and taxable income proportions at both member and Fund level are:

	Member 1	Member 2	Fund
Draft tax exempt income proportion	48.272%	12.487%	60.759%
Draft taxable income proportion	39.241%	0.000%	39.241%

Draft expense deductibility proportion

The result below is the proportion of fund liabilities over the financial year supporting non-retirement phase interests. For an expense that can't be attributed to solely producing assessable or exempt income, this proportion may be used to determine how much is deductible.

Draft expense deductibility proportion: 39.241%

 $You should \ determine \ whether this \ proportion \ is \ fair \ and \ reasonable \ for \ each \ relevant \ fund \ expense.$
