The members are	Family
The members are aged	53 to 58

It is not intended that other members will be admitted to the Fund. The current intention is for each of the members to receive a retirement benefit at age 60 or later when they intend retiring from the workforce.

### 2 Benefit design

The benefits provided by the aforementioned superannuation fund ("*the Fund*") principally consist of accumulation benefits. These are based on accumulated net contributions and interest on them.

The Trustee invests Fund assets with regard to the need to realise the investments when the members plan to retire for the purpose of paying benefits by lump sum or allocated pension, as the Trustee decides.

### 3 Future contributions

The members intend to contribute to the Fund as much as their annual earnings permit after taking into account amounts set aside for living expenses and other business activities. Consequently, members will be relying predominantly on investment returns of the Fund to produce benefits for their retirement.

### 4 Investment risk

Members bear the investment risk and rewards. Returns for the Fund's investments are added to members' accounts.

### 5 Investment objectives

The Fund's overall investments objective is to maximise investment return over the medium term to long term, while controlling the investment risk by investing across the range of asset classes. Specifically the Trustee intends:

- to achieve investment returns which exceed the rate of inflation (as measured by the change in the level of Average Weekly Earnings) by at least 2% per annum over periods of 5 years or more;
- to achieve an investments return (net of tax and charges) that exceeds cash rates where measured on a rolling 5 year basis.

Investment performance is monitored regularly.
